

Clément BARRIÈRE

Software Engineering & AI Student

Artificial life - NLP - machine learning - modeling - information systems - international

(+33) 7 71 82 35 60 · clementbarriere64@gmail.com · clembarr.dev · linkedin.com/in/clement-barriere

PROFESSIONAL EXPERIENCE

AI Engineer • Apprenticeship - Thales, Cholet, France

Sept. 2026 - Sept. 2029

- Research, design, and prototyping LLM based solutions, applied to military radiocommunications. Environments with high security constraints.

Software Engineer • Apprenticeship - CGI, Bordeaux, France

Sept. 2025 - Sept. 2026

- R&D on Grand Angle, ERP deployed across 300 French local government bodies. Designed functional evolutions for financial flow management and PES exchanges (public accounting chain). AGILE method and strict processes.

Artificial Life Researcher • Internship - ALIFE-CORE, Nagoya University, Japan

Apr. 2025 - Jun. 2025

- LLM openness and assessment for the use of linguistic bias as creativity engines.
- Designed novel evaluation metrics; results co-presented at **JSAI 2025**, Osaka.

EDUCATION

M.Eng. in Computer Science & Data - ESIEA, Paris

2026 - 2029

B.Tech. in Computer Science, Application Development - IUT de Bordeaux Gradignan

2023 - 2026

French Baccalauréat — Maths & CS, advanced maths track - Lycée Jay de Beaufort, Périgueux

2023

PROJECTS (clembarr.dev)

VeridisQuo - Deepfake Detection

2025

- Hybrid model combining spatial (CNN) and frequency (FFT + DCT) analysis, with face detection, result aggregation and classification, and real time visualization.

Python PyTorch YOLO OpenCV Open Source

FFBF - Detection of Novelty and Anomalies

2026

- Fixed size data structures with constant time updates for continuous evaluation of data streams. Measurement of spatial and temporal distances for a nuanced score, describing conventional and aberrant behaviors.

Rust Prototype Biomimétisme Data Open Source

ConX - Personal RAG System

2026

- RAG system for personal knowledge management, locally hosted. Hybrid search, retrieval methods, and a custom LLM answering. Also embeds MCP services for auto ingestion from various sources, such as personal Obsidian vaults.

SKILLS & INTERESTS

Languages

Python, Rust, Java, C/C++, PL/SQL, TypeScript, React, Tailwind CSS, Angular, Bash, Go

AI/ML & Data

PyTorch, NumPy, Pandas, Scikit-learn, Matplotlib, Transformers, UMAP, Prompting, Langchain

Tools & DevOps

Git, Docker, CI/CD, Jira, Figma, Scrum, GitHub, GitLab

Domains

AI, Artificial Life, Modeling, Machine Learning, Software, Research, Cognitive Science, Data, NLP, LLM

Languages

French (native), English (C1), Spanish (B1), Japanese (basics)

Interests

Swimming, Powerlifting, Philosophy, Nature, Scientific Watch
